### **RESOLUTION 2020-02-01**

A RESOLUTION OF THE DOWNTOWN INVESTMENT AUTHORITY ("DIA") ADOPTING THE RECOMMENDATION OF THE RETAIL **ENHANCEMENT PROPERTY** DISPOSITON **COMMITTEE** AND SELECTING SPANDREL DEVELOPMENT **PARTNERS** ("DEVELOPER") AS THE MOST RESPONSIVE BIDDER TO NOTICE **OF** DISPOSITION ISP-0307-20 **FOR** THE DEVELOPMENT/REDEVELOPMENT OF CITY OWNED RIVERFRONT PROPERTY COMPRISED OF DUVAL COUNTY TAX PARCELS 074443-0000 (220 EAST BAY STREET) AND 073358-0000 (330 EAST BAY "SOLICITATION"); (THE FINDING THE **SPANDREL** DEVELOPMENT PARTNERS PROPOSAL, ATTACHED HERETO AS 'A', IN **EXHIBIT FURTHERANCE OF** THE NORTH DOWNTOWN CRA PLAN AND IN THE **PUBLIC INTEREST: AUTHORIZING** THE CEO OF THE DIA TO COMMENCE NEGOTIATIONS WITH THE DEVELOPER AND PRESENT TO THE **TERM** SHEET **FOR DISPOSITION BOARD** DEVELOPMENT OF PHASE 1 ("COURTHOUSE SITE") AND A CONTINGENT SALE AND REDEVELOPMENT FOR PHASE 2 (THE "ANNEX SITE") IN **ACCORDANCE** WITH THE PROPOSAL SUBMITTED BY DEVELOPER AND OTHERWISE TAKE ALL NECESSARY ACTION TO EFFECTUATE THE PURPOSES OF THIS RESOLUTION; PROVIDING AN EFFECTIVE DATE.

WHEREAS, the City owns two tax parcels bounded generally by Newnan and Liberty Streets and fronting on Bay Street identified by Duval County Tax Parcel Numbers 073358-0000 (the "Courthouse Site") and 07443-0000 (the "Annex Site") (collectively, the "Property"); and

WHEREAS, the Property is located within the North Bank Downtown Community Redevelopment Area ("North Bank CRA"); and

WHEREAS, DIA is the designated Community Redevelopment Agency for the North Bank CRA, to which a Community Redevelopment Plan was adopted by Ordinance 2014-0560-E; and

WHEREAS, on September 18, 2019, the DIA Board adopted Resolution 2019-09-03, instructing its CEO to cause to be issued a Notice of Disposition for the Property, consistent with Florida Statutes Chapter 163.380(3)(a) City of Jacksonville Ordinance Code Chapter 122, Subpart C Community Redevelopment Real Property Dispositions and incorporating the terms of and scoring criteria for such disposition; and

WHEREAS, the DIA through the City's Procurement Division, released on October 21, 2019, ISP-0307-20 - Notice of Disposition with a Proposal Due Date of January 22, 2020; and

WHEREAS, the DIA received two (2) bid proposals in response to ISP-0307-20; and

WHEREAS, the bid proposals were scored by the appointed scoring committee based on criteria and points assigned; and

WHEREAS, based on the scores assigned by scoring committee members, Spandrel Development Partners was ranked number one and The Related Group was ranked number two; and

WHEREAS, the proposal of Spandrel Development did not include Area 3, the submerged lands; and

WHEREAS, the proposal of Spandrel Development was divided into two phases, the first of which is located entirely on the Courthouse Site; and

WHEREAS, the right of first refusal with respect to the Annex Site remains in effect; and

WHEREAS, the Retail Enhancement and Property Disposition committee of the DIA considered the rankings and score sheets, the NOD responses, and answers provided by the respondents at their publicly noticed meeting held on February 11, 2020 and has identified Spandrel Development Group as the respondent whose proposal is deemed in the public interest, furthers the North Bank Community Redevelopment Area Plan and furthers Sec. 163.380 Florida Statutes, and it is recommended by the committee that the DIA Board approve this resolution to enter into negotiations for a Term Sheet with Spandrel Development Group for the sale and redevelopment of the Courthouse Site and a contingent sale and redevelopment of the Annex Site.

**NOW THEREFORE, BE IT RESOLVED** by the Board of the Downtown Investment Authority:

**Section 1**. The DIA finds that the recitals set forth above are true and correct and are incorporated herein by this reference.

Section 2. The DIA, following consideration of the score rankings, the recommendation of the Retail Enhancement and Property Disposition Committee, and the Northbank CRA Plan and BID Plan at their publicly noticed meeting held on February 19, 2020, hereby adopts the recommendation of the Retail Enhancement and Property Disposition Committee, selecting Spandrel Development Company as the respondent whose proposal is deemed in the public interest, furthers the North Bank Community Redevelopment Area Plan and furthers Sec. 163.380 Florida Statutes.

Section 3. The DIA hereby authorizes the CEO of the DIA to negotiate a Term Sheet with the Developer with respect to the sale and redevelopment of the Courthouse Site in accordance with the Developer's proposal for Phase 1, and terms and conditions attendant to a

contingent sale and redevelopment of the Annex Site, consistent with the Developer's proposal. Such term sheet shall be presented to the DIA Board for approval.

**Section 4.** This Resolution shall become effective on the date it is signed by the Chair of the DIA Board.

### SPANDREL DEVELOPMENT PARTNERS PROPOSAL

The Spandrel Development Partners Proposal can be found on the following pages.

### I. Cover Letter

Dear Ms. Boyer, DIA Team, and DIA Board of Directors,

Please find enclosed our Team's collective response to the Ford on the Bay Notice of Disposition for your consideration. Our best-in-class team consists of Spandrel Development Partners as the developer, LS3P as the lead architect, Dasher Hurst as the local architect, Wood + Partners as the landscape architect, Kimley Horn as a multifaceted consultant, and Driver, McAfee, Hawthorne, Diebenow (DMHD) as our legal counsel (collectively the "Team").

Our team offers the perfect blend of required local, regional, and national experience across many similar projects to tackle the many complexities of the Ford on the Bay development sites and restore them to the prominent position in Downtown Jacksonville. Spandrel has successfully completed over \$300mm worth of development work with LS3P and Wood + Partners in the Southeast, and the Team plans to bring our proven processes and procedures already employed to make this development a success. The Team will leverage the Jacksonville expertise of Dasher Hurst, Kimley Horn, and DMHD to ensure local requirements and intricacies are handled swiftly and to the highest standard. We also pride ourselves on building a blue-chip team of local consultants to augment the aforementioned team.

The Team lauds the DIA for your vision of a revitalized Downtown core in Jacksonville and proactive stance on turning this vision into reality. We believe these sites are a key catalyst of realizing this vision of continued growth and revitalization of Downtown Jacksonville for several reasons. First, the visibility of the sites situated on the St. Johns River, their prominence in the Jacksonville skyline, and their role throughout history provide the DIA with a generational opportunity to set a new design standard for future development downtown. The Team has carefully taken these three key factors into the consideration of our design. Second, the sites sit at the confluence of four burgeoning downtown submarkets: the Stadium and Shipyards, the Elbow, the Central Civic Core/CBD, and the Riverfront. The development of these sites through our bespoke mixed-use vision will not only serve to create a vital point of connectivity among these submarkets, but also enhance each submarket by offering a fresh program of uses. Finally, the sites anchor the ongoing Riverwalk renovations and present the opportunity to create a new riverfront destination for all Jacksonville residents and visitors to enjoy. The Team has carefully tailored our development vision to meet the requirements of the NOD with these thoughts in mind.

We thank you for your consideration and look forward to working with you on this opportunity.

Emanuel D. Neuman Principal, Spandrel Development Partners

Our team for the Ford on the Bay RFP process will consist of Spandrel Development Partners as the developer, LS3P as the lead architect, Dasher Hurst as the local architect, Wood + Partners as the landscape architect, Kimley Horn as a multifaceted consultant, and DMHD as our legal counsel. The Team will be led by the developer, Spandrel Development Partners. Spandrel Development Partners is a New York City based, multi-disciplined real estate development firm. The company is focused on developing mixed-use, multifamily, hospitality and retail projects in target cities of growth, with a focus on the Southeast. Spandrel uses a proprietary screening analysis to filter and rank the 383 Metropolitan Statistical Areas (MSAs) of the United States based upon job growth, wage growth, population growth, and high-tech GDP growth all within right-towork states. The Jacksonville MSA has consistently ranked highly in our proprietary analysis due to tremendous job and population gains. From concept through construction, Spandrel leverages its principals' decades of experience and relationships, while bringing an ownership perspective to the development process that is focused on excellence and the creation of long-term value.

A unique benefit of Spandrel Development Partners is daily principal involvement in all company projects. Spandrel Development Partners is led by its two principals, Emanuel Neuman and Ian Levine. Prior to co-founding Spandrel in 2013, Emanuel spent over a decade in investment banking, investment management, and business operations, while Ian spent 16 years with RAL Companies and Affiliates, LLC as Chief Financial Officer and Chief Operating Officer as well as CEO and President of Spandrel Property Services, Inc. Both Emanuel and Ian will be directly responsible for the daily oversight of the Ford

on the Bay development for Spandrel Development Partners. Emanuel and Ian will be supported by an experienced internal team that includes a Chief Financial Officer with over 25 years of leadership and financial management experience, a Director of Construction with almost 20 years of experience in construction management, an associate, an analyst, and Spandrel's internal accounting department. Spandrel Headquarters is located in midtown Manhattan, but our Director of Construction is based out of our office in Charleston, SC. Principals of Spandrel and our Director of Construction have a perpetual presence on-site, ensuring constant and direct oversight. The Spandrel Team prides itself on its strong ground presence in the Southeastern markets in which we operate, as well as assembling and leveraging the skillsets of a blue-chip local team of consultants.

As discussed briefly in the Cover Letter, the Team is especially attracted to the Ford on the Bay opportunity due to the ability to develop a mixed-use, residential-driven destination along the waterfront in Downtown Jacksonville. Collectively, our Team has extensive experience and excels at developing complex mixed-use projects on comparable urban infill sites throughout the East Coast. Since updating our proprietary analysis at the beginning of 2019 and seeing Jacksonville move up our list, Spandrel has been intently studying the market and looking for the right site for our first foray into the Jacksonville market. Our experience in primarily developing on urban infill locations narrowed our focus for site selection to the Downtown and South Bank areas. We believe we can leverage our experience to add the most value to a community through intricate mixed-use urban vertical

development. Downtown Jacksonville has seen more limited urban infill interest than other markets we have studied in the Southeast and we see this as a tremendous opportunity. Through careful programming of uses and best-in-class architecture, Spandrel and the Team plan to create a first-of-its-kind destination in Downtown Jacksonville that will connect neighborhoods and catalyze future development.

In agreement with the recommendations set forth by the DIA in the Notice of Disposition, the Team believes the key use for these sites should be high density residential supplemented by serviceoriented retail along Bay Street and the riverfront. Given how construction costs have escalated exponentially over this current economic expansion and where multifamily rents are currently in Downtown Jacksonville, high-rise development is currently economically infeasible. As such and to maximize density, the Team has settled on a program that is centered around highdensity mid-rise multifamily with structured parking and retail in the base. In conjunction with this mix of uses, we have carefully curated both landscaping and the use of public open space to provide a new urban greenspace and destination to the community of Downtown Jacksonville, including the extension of the River Walk along what was formerly Courthouse Drive. One of the key attributes and highlights of this development will be its interaction with the St. Johns River. Each feature, from the architectural elements to the placement of open space, has been thought of in its relation to the River. This interaction with the River will be crowned by the extension of the River Walk and creation of a heavily landscaped public plaza on the South side of the Area 2

development that will be anchored by service-oriented retail and public outdoor seating.

We believe the key for catalyzing future development in Downtown Jacksonville is adding residential density within the Downtown core. More Downtown residents will support and catalyze the retail, helping to establish a 24/7 live-work-play environment in Downtown Jacksonville. However, introducing too many units to the market at one time would stagnate absorption and not set our development up to succeed. As such, we have decided to develop Areas 1 and 2 in phases, commencing with Area 2 (2.89 acres). Once the residential and retail in Area 2 has stabilized, we plan to commence the development of Area 1 (2.39 acres) within the 48-month timeframe required by the Notice of Disposition. We have decided to name Area 2 The Enclave on the Bay and Area 1 The Exchange on the Bay, as a reference their respective programs.

Our program for The Enclave on the Bay would include 272 Class A residential units across two buildings that would be bisected by a landscaped public muse leading to the riverfront. In the ground floor along Bay Street, we are planning 42,683 square feet of service-oriented retail to create a vibrant retail corridor. The buildings would wrap a 5 story structured parking garage containing 317 spaces. On the South side of the site, we have incorporated a public plaza anchored by service-oriented retail in the base of the building and an extension to the River Walk along what was formerly Courthouse Drive.

The Exchange on the Bay would follow a similar program anchored by high density residential over retail along Bay Street. The development on The Exchange on the Bay would begin upon the stabilization of The Enclave on the Bay and feature 247 Class A multifamily units and 31,861 square feet of service-oriented retail. Our goal for The Exchange on the Bay would be to work with the City to secure an urban grocer to anchor this retail space. We believe that the grocery use on this side of the Downtown would be a tremendous value add to not only the residents of Downtown Jacksonville, but also those who work in the nearby office towers and Civic Core. To service the multifamily and retail, a 5 story structured parking deck containing 338 spaces will be wrapped by the building. In addition to the multifamily, retail, and structured parking, we plan to create a landscaped alley and public plaza along the South side of the site, connecting Newman Street to the River Walk extension along Courthouse Drive.

We believe that this program will provide a substantial benefit first and foremost to the City of Jacksonville. Not only will our proposed development vastly improve long underutilized riverfront land, but it will also add nearly two acres of newly landscaped public space to Downtown Jacksonville, highlighted by a beautiful extension to the River Walk. While we anticipate the River Walk extension to cost \$5mm, the comprehensive benefit to the City of Jacksonville of our placemaking effort will be multiples of that and long lasting.

Further, Spandrel's \$136mm investment in Downtown Jacksonville will have a multiplier effect with a much broader impact on the Downtown Jacksonville economy. This development will not only set a new precedent and catalyze future development in the downtown core, but also add 519 units or 623 beds Downtown. This influx of new residents will increase the tax base Downtown and help invigorate the struggling retail. More people living Downtown also means less people driving to work and a reduction in congestion and pollution. All in all, the Ford on the Bay developments will provide Downtown Jacksonville with a lasting economic benefit well in excess of what can be quantified today.

The Team intends to bid on Areas 1 (2.39 acres) and 2 (2.89 acres). Spandrel is a for-profit real estate development firm and is pursuing the Ford on the Bay opportunity as an investment. As such and to ensure our required return threshold is achieved, we plan to sell each building upon stabilization to institutional-grade investment firms such as insurance companies, pension funds, or sovereign wealth funds. We anticipate holding each building for at least 36 months from the commencement of construction. Spandrel will hire a best-in-class property management firm with local Jacksonville experience to manage the property post construction during lease-up and through stabilization. For The Enclave on the Bay, we have underwritten \$2.15 / SF rents today, which would be top-of-market. For The Exchange on the Bay, we have assumed a slight discount at \$2.11 / SF today, as these units would not warrant the same view premiums as those in The Enclave on the Bay. In each case, we have trended the rents and expenses over the next 5 years at 2.75%, 1.5% for years 5-10, and then 1% thereafter. We plan to use the DIA's REV Grant program and have incorporated this into our underwriting. Taking all assumptions into account, we anticipate achieving a 6.46% return-on-costs of \$70.8mm from the development of The Enclave on the Bay and a 6.88% return-on-costs of \$65.2mm from the development of The Exchange on the Bay. Our financial assumptions, more detailed returns, and proforma can be found in detail in our Financial Proposal.

### SPANDREL DEVELOPMENT PARTNERS

Spandrel Development Partners is a New York City based, multi-disciplined real estate development firm. The company is focused on developing mixed-use, multi-family, hospitality and retail projects in target cities of growth, with a focus on the Southeast. Spandrel uses a proprietary screening analysis to filter and rank the 383 Metropolitan Statistical Areas (MSAs) of the United States based upon job growth, wage growth, population growth, and high-tech GDP growth all within right-to-work states. The Jacksonville MSA has consistently ranked highly in our proprietary analysis due to tremendous job and population gains. From concept through construction, Spandrel leverages its principals' decades of experience and relationships, while bringing an ownership perspective to the development process that is focused on excellence and the creation of long-term value.

A unique benefit of Spandrel Development Partners is daily principal involvement in all company projects. Spandrel Development Partners is led by its two principals, Emanuel Neuman and Ian Levine. Prior to co-founding Spandrel in 2013, Emanuel spent over a decade in investment banking, investment management, and business operations, while Ian spent 16 years with RAL Companies and Affiliates, LLC as Chief Financial Officer and Chief Operating Officer as well as CEO and President of Spandrel Property Services, Inc. Both Emanuel and Ian will be directly responsible for the daily oversight of the Ford on the Bay development for Spandrel Development Partners.

Emanuel and Ian will be supported by an experienced internal team that includes a Chief Financial Officer with over 25 years of leadership and financial management experience, a Director of Construction with almost 20 years of experience in construction management, an associate, an analyst, and Spandrel's internal accounting department. Spandrel Headquarters is located in midtown Manhattan, but our Director of Construction is based out of our office in Charleston, SC. Principals of Spandrel and our Director of Construction have a perpetual presence on-site, ensuring constant and direct oversight. The Spandrel Team prides itself on its strong ground presence in the Southeastern markets in which we operate, as well as assembling and leveraging the skillsets of a blue-chip local team of consultants.

LS3P celebrates over 55 years of dedication to our clients and the communities in which we practice and live. Founded on May 1, 1963, by Frank Lucas, FAIA, LS3P has since grown to include a professional staff of over 300 serving the Southeast from offices in Charleston, Columbia, Greenville, Myrtle Beach, Charlotte, Raleigh, Wilmington, and Savannah. Our network of offices allows us to provide the resources and expertise of a large firm with the personal attention of a small firm. We offer total design capabilities from site selection to occupancy within the firm, yet we remain focused on excellent client service.

Today, LS3P is led by CEO Thompson E. Penney, who started at the firm as a high school intern; CEO-Elect Marc Marchant; Chief Practice Officer Katherine Peele; Chief Operations Officer George Temple, IV; Chief Relationships Officer Chris Boney; and Marketing & Communications Officer Katie Robinson. Our practice leaders serve a broad array of markets including aviation and transportation, military and government, higher education, healthcare, K-12 education, hospitality, historic preservation, commercial, worship, and residential.

LS3P's enduring legacy is expressed through our clients' successes. Their stories reflect the integrity, excellence, empowerment, collaboration, balance, caring and stewardship that are the foundation of LS3P. Our commitment to clients is a lifetime endeavor built on common trust and admiration.

The design of this project will be lead by LS3P's Charleston office with support from the Savannah office, whose work has added to the charm of both cities for over 50 years.

Dasher Hurst Architects PA is a Jacksonville-based full service architectural and interior design firm founded by Glenn Dasher, AIA, LEEP AP and Tom Hurst AIA LEED AP with a goal of providing quality service and sophisticated design solutions to our clients. As former principal designers at larger firms, our experience has allowed us to design and manage projects of all imaginable scopes and sizes. This past experience coupled with the intimate, personal service inherent to a small design

firm allows us to provide our clients with the BEST OF BOTH WORLDS; exceptional hands-on service and first class design solutions. As principals we are actively involved from start to finish in all our projects providing our clients the leadership, experience and personal comitment that establishes trust and builds long term relationships.

Our resumes include planning, commercial, retail, education, hospitality, industrial, religious and residential projects. Included in this portfolio are intensive renovation projects, including historic preservation, as well as new construction. Regardless of the scale or scope of the project, our emphasis is always on providing creative solutions and a high level of quality design appropriate to each client's project requirements, budget and schedule.

Wood+Partners Inc. is an award-winning land planning and landscape architecture firm specializing in mixed-use commercial, resort hotels, urban design, multifamily, and retail shopping destinations, parks and recreation facilities, waterfront developments and university and college campuses. The firm was founded in 1988 and company President Mark Baker, ASLA along with Principals Kyle Theodore, ASLA, Todd Theodore, ASLA, Trey Griffin, ASLA and Shawn Kalbli, ASLA lead a professional staff of landscape architects, urban planners and designers that specialize in providing professional services to public and private sector clients. With offices in Tallahassee and Hilton Head Island, the firm's work stretches over a wide variety of geographic regions and includes projects and clients throughout the Southeastern and Gulf Coast states, as well as the Caribbean.

# Kimley » Horn

Founded in 1967, Kimley-Horn is a full-service, employeeowned, multidisciplinary consulting firm offering a broad range of engineering, planning, landscape architecture, and environmental services to clients in both the private and public sectors. Over the years, we have grown from a small group of engineers and planners to one of the most respected consulting engineering firms in the nation—and a recognized leader in land development. Today, Kimley-Horn has approximately 4,100 employees in more than 90 offices across the United States and in Puerto Rico, offering a full range of consulting services to local, regional, national, and international clients. At Kimley-Horn, we understand the office park environment, the philosophy of those responsible for its planning and maintenance, and the staff who thrive on it. Our team will provide you with customer-focused consulting services. In addition, ENR named Kimley-Horn the 2015 Southeast Design Firm of the Year.

EDUCATION

Bachelor of Science in Accounting,

Babson College

Emanuel D. Neuman, Co-Founder of Spandrel Development Partners, LLC oversees the firms investment strategy, deal origination, transaction underwriting and community engagement. Prior to co-founding Spandrel in 2013, Emanuel spent over a decade of experience in investment banking, investment management and business operations.

Throughout his career, he has advised and invested in transactions valued at more than \$1 billion. At Spandrel Development, Emanuel leverages his financial expertise and long-standing relationships to filter, analyze and finance the company's projects. Prior to the launch of SDP, Emanuel was Co-Portfolio Manager at Unterberg Capital LLC, a long-only investment fund named as one of 2010's "Top Performers" by Bloomberg. In this role, he managed the fund's launch, originated and evaluated portfolio positions, conducted extensive industry research and due diligence, created and maintained strong relationships with company management teams, and managed outreach to buy-side and sell-side analysts.

Previously, Emanuel was Vice President in the investment banking division at Collins Stewart, LLC (formerly C.E. Unterberg, Towbin LLC), where he led the origination, execution and marketing of a wide range of public and private equity offerings and M&A transactions. Earlier in his career, Emanuel was VP of Global Operations at FN Holdings in Moscow, Russia. His responsibilities there included global operation of the four divisions within the holding company, management of the 1,000-person workforce and day-to-day operations, and structuring of private equity investments.

EDUCATION

Bachelor of Science in Business

Administration from Babson College

lan Levine, Co-Founding Principal of Spandrel Development Partners, LLC, specializes in property and asset management, operational and financial oversight, as well as construction and funding monitoring of mid and large-scale projects having completed and consulted on projects valued in excess of \$2 billion.

At Spandrel Development Partners, Levine is responsible for overseeing project budgets, design feasibility, marketing and branding efforts, corporate and project insurance review and procurement, lender relations, construction process, procurement, and oversight as well as preparing requisitions and financing contingencies for investors and financial institutions. Prior to forming SDP, lan spent 16 years with RAL Companies And Affiliates, LLC as Chief Financial Officer and Chief Operating Officer as well as CEO and President of Spandrel Property Services, Inc. RAL's affiliated property management and brokerage firm.

At RAL Companies And Affiliates, LLC a developer of luxury apartment, condominium and resort communities nationwide, lan provided asset management, operational and financial oversight of multiple mid and large-scale projects which included such projects as Tower 270 Condominium in Tribeca, New York, the Franklin Tower in Tribeca, New York, Loft 25 Condominium in Chelsea, New York, One Brooklyn Bridge Park Condominium in Brooklyn, New York, the New Yorker Condominium, New York, New York as well as The Inn At Lost Creek in Telluride, Colorado.

lan has been a member of the International Council Of Shopping Centers, the New York Association Of Realty Managers, the Real Estate Board Of New York and the Institute Of Real Estate Management.

### PETER COCCHIA

### CHIEF FINANCIAL OFFICER

#### **EDUCATION**

Bachelor of Science in Accounting from Villanova University

Peter Cocchia brings more than 25 years of Chief Financial Officer leadership and financial management experience in both public and private construction and development companies. Peter was most recently the regional Chief Financial Officer of Tutor Perini Building Corp, a wholly-owned subsidiary of Tutor Perini Corporation (NYCE: TPC), one of the nations largest civil, building and specialty construction companies. Prior to Tutor Perini, Peter was Chief Financial Officer of Keating Companies, a large, diversified construction management and real estate development firm.

Peter is a Certified Public Accountant and a member of the American Institute of Certified Public Accountants and Pennsylvania Institute of Certified Public Accountants. He is also a Certified Construction Industry Financial Professional (CCIFP) and a member of the Construction Financial Management Association (CFMA).

# ERIC SPIEWAK DIRECTOR OF CONSTRUCTION

SPANDREL DEVELOPMENT PARTNERS

### **EDUCATION**

University of Delaware - Lerner College of Business and Economics

Eric Spiewak is Director of Construction at Spandrel Development Partners. Eric joins Spandrel after nearly 20 years in the Construction Management industry. He is responsible for managing all aspects of design and construction while ensuring that deadlines and budget parameters are met. Eric brings his precise attention to detail to every project to deliver successful ventures on time and on budget.

Prior to joining Spandrel Development Partners, Eric worked for multi-national and large regional construction firms based in Philadelphia and Atlanta on construction projects in various U.S. metropolitan markets. Eric has been in essential roles in well over \$1 Billion in construction projects ranging from 40 story condominium towers to wood framed multifamily. Eric brings decades of experience to help execute the Spandrel vision.

# COMMUNITY INVOLVEMENT & PROFESSIONAL AFFILIATIONS

AIA Savannah Chapter President (2002) AIA Georgia Chapter President (2017) USGBC LEED Accredited Professional Principal Neil Dawson, AIA, serves as LS3P's Savannah Office Leader. With over thirty years of experience in planning, design, and historic preservation projects across coastal Georgia and the Southeast, Neil is highly skilled at navigating the requirements of complex building design with significant technology and sustainability requirements.

Neil has built and renovated over 600 structures in Savannah's Historic District. Project by project, from small renovations to large-scale adaptive reuse designs, Neil has not only revitalized Savannah physically through designing, preserving, and improving buildings that form this urban experience, but he has also had a significant impact on the economic vitality of all Savannahians. Neil has preserved and re-imagined historic structures, saving them from neglect or demolition.

Neil has been honored with numerous awards at the city, state, and national levels; his work on the SCAD Museum earned an AIA National Design Award in 2014, and his work has been published in the New York Times.

Member, American Society of Landscape Architecture (ASLA), Advocacy and Licensure, Florida Chapter

Member, Urban Land Institute (ULI)

Mike is a professional landscape architect with more than 23 years of experience. His project experience includes land planning, master planning and programming, streetscape design, parks and recreation programming and design, site planning, amenity and hospitality programming and design, custom hardscape design and detailing, construction document preparation and permitting, construction phase services, and preparation of presentation graphics. Mike is also experienced in facilitating public engagement meetings and various design charrettes. He takes pride in building consensus and partnering with public and private sector clients to implement memorable, functional, and sustainable places that both inspire wonder and creatively solve complex challenges. Mike has had significant involvement on hundreds of Kimley-Horn's projects across the country.

### RELEVANT PROJECTS

Baymeadows Park, Jacksonville, FL — Landscape architect. Kimley-Horn is the lead consultant for the redevelopment of a failed golf course into a multi-use commercial center that includes hotels, restaurants, and retail. Services provided include civil engineering, land planning, environmental remediation, and permitting. This site is located at the northwest quadrant of the Baymeadows Road (SR 152) and Baymeadows Circle East intersection in Jacksonville, FL.

Landscape Design Services for SR 200/A1A, FDOT District Two, FL — Project manager for the land-scape architectural design of over five miles of SR 200, including several intersections. This corridor is part of the main access route for visitors to Amelia Island. The proposed design focuses creating a signature landscape corridor utilizing design elements that embrace coastal dune hammock. Efforts will include community outreach and public consensus building, landscape analysis, landscape and hardscape design, and irrigation.

Gaduate Class of 2016, Florida Engineering Leadership Institute (FELI) Joseph ("Joe") Mecca, a professional engineer in Florida and Georgia, has 26 years of experience in the design and permitting of multi-family residential, commercial, institutional and municipal site development projects. He is specialist in redevelopment projects and an expert in design and permitting of site infrastructure. Joe's expertise includes site concept plan development, due diligence studies, permitting strategies and unique solutions to complex projects. Joe has been the project manager for numerous land development projects of varying property types, from conceptual planning through construction observation. Joe has built very strong local and state agency relationships and has excellent knowledge of the permitting processes in Northeast Florida.

### RELEVANT PROJECTS

Baptist/MD Anderson Cancer Center, Jacksonville, FL — Project manager. Kimley-Horn is providing entitlement, traffic engineering, site civil engineering, and permitting services for the 505,000-square-foot Baptist/MD Anderson Cancer Center, located in downtown Jacksonville. Kimley-Horn is responsible for aiding Baptist Medical Center and their team on zoning and land use entitlements, mobility fee negotiations, a major downtown traffic study, and the preparation of site development drawings for the state-of-the-art cancer treatment facility.

Global Home of the PGA Tour, Ponte Vedra Beach, FL — Project engineer. Kimley-Horn was selected to provide professional planning and civil engineering services for the development of the new 187,000-square-foot Global Home of the PGA TOUR. In addition to the three-story Global Home building, the site will include future office expansion areas, a spectator village, as well as an admissions gate and shuttle drop-off zone. Kimley-Horn is providing entitlement planning, engineering, and permitting services. The scope of services also includes roadway design, traffic engineering, signal design, civil/site plans, and construction phase services.

The Team's past project experience is included in each member's qualifications in the previous section. However, we would like to draw your attention to the following development spearheaded by Spandrel's Ian Levine in his time prior to Spandrel as a principal at RAL Companies.

At over one million square feet and costing \$450 million, One Brooklyn Bridge Park is the largest residential conversion in Brooklyn's history. The building's waterfront location and adjacencies to the desirable Brooklyn Heights neighborhood, and the planned Brooklyn bridge Park provide an ideal context for a luxury residential and mixed-use building. Ian and the RAL team's work with City and State agencies assisted in the structure and financing of the park, and was instrumental in enabling the park's development. One Brooklyn Bridge Park's ongoing subsidy of the park is a textbook example of a "win/win" public/private partnership.

The building incorporates a wide range of housing types including waterfront town houses, spacious lofts, apartments ranging from one to four bedrooms, and terraced penthouse residences, all of which capitalize on the sweeping 360-degree views of New York Harbor. Every detail was planned carefully from custom Italian kitchens, terrazzo-filled baths, and high-end appliances in the music room, children's playroom, yoga studio, game/billiard room, golf simulator, and outdoor putting green. Ian and the team applied their understanding of the urban housing market, along with a strong design sensibility to create spaces that are at once inviting and high tech. While the residences reflect the twenty-first century, the overall approach to the rehabilitation of the building was sensitive to the rich past of the Brooklyn waterfront. Echoes of the bustling waterfront shipping center that was 19th century Brooklyn are reflected in the adaptation of the structure to modern use. The building also incorporates retail and commercial uses complementary to the surrounding park and public access corridors.

lan plans to bring this comparable mixed-use waterfront development experience to our proposed development of the Ford on the Bay sites.

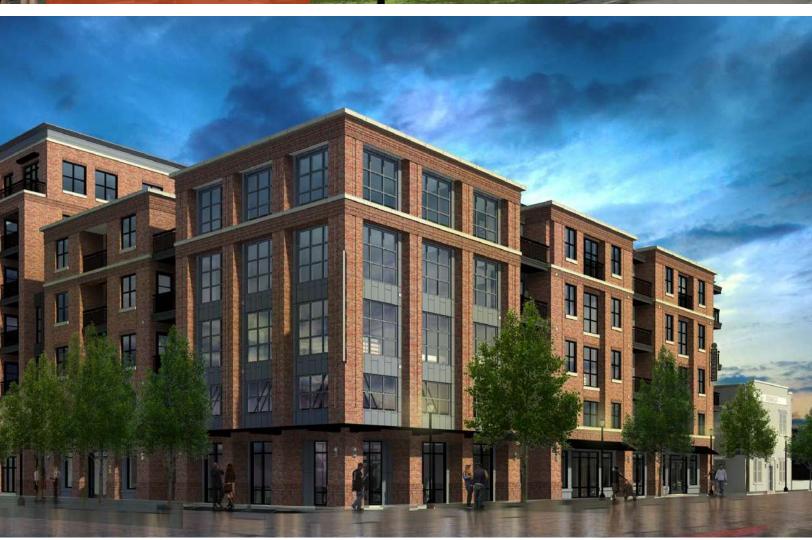

This 270,000 SF development provides 270 beds in 221 apartments, with street level retail and a 56,000 SF parking deck. Located in a renovated historic building along Charleston's Meeting Street, the development capitalizes on the neighborhood's status as a hot spot for downtown development, as there are currently at least 3-4 other large multi-family projects in the works surrounding this site.

As the project site is the former location of the old Grace and Peraman Bridges connecting Charleston to Mt. Pleasant, the design includes architectural references to the historic bridge structures.

parking located at the corner of King and Spring Streets in downtown Charleston. The building is approximately 124,000 SF and has 74 residential units ranging from studios to 5 BR having a total of 258 beds. The ground floor is comprised of about 12,000 SF of retail space, building lobby, fitness center, leasing center and a few ground level apartments. The second floor contains a pool deck that will overlook a future park with adjacent club room and study room for resident use. Floors 3-7 contain a mix of residential units with a common study room located on each floor for resident use. The design of the building is more classical as it is located on a prominent corner of Charleston with materials such as brick, stone panels and some metal panel making up the various facades.

**COMPLETED** | 2019

**SIZE** | 124,000 SF 12,000 SF RETAIL

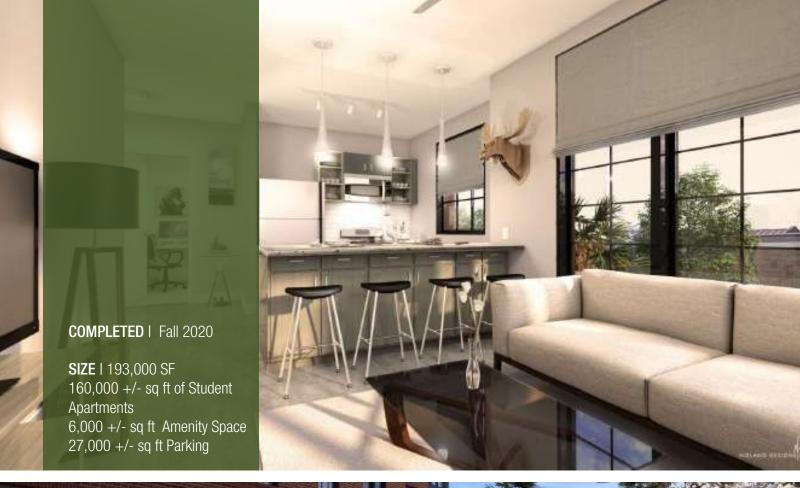

530 Meeting Street is a 184,000 SF 5-story development that includes 114 market rate and workforce housing apartments with 360 beds. The project includes a 25,000 SF of parking and 8,000 sf of amenity on the ground floor along with a few residential units. This area is a central to many for current developments in downtown Charleston as there are currently at least 3-4 other large multi-family projects on the boards surrounding this site.

Wood+Partners Inc. (Landscape Architect) is providing design through construction phase services for The Baxly mixed-use site located in Savannah, GA. Our landscape architectural services include streetscape improvements, sidewalks, courtyards and roof top paving, plazas, terraces, specialty paving areas, pools, fountains, walks and other hardscape elements and landscape plantings and irrigation. The new 360,000 square foot facility is a total of seven floors and includes three floors of partially underground parking along with amenities within the central core on floor three. When complete, the new facility will provide retail, live/work, and amenity spaces on the ground floor along with residential apartments above.

The design for the new Jasper is based on a "building in the park" concept. Positioned in the center of the site with generous green setbacks from the surrounding streets, the building is surrounded by public amenities including Colonial Lake, Moultrie Playground, and the Ashley River Walk. The gardens surrounding the buildings preserved the site's existing grand oak trees.

The mixed-use building, inspired by details from the historic People's Building, Fort Sumter House, and Francis Marion Hotel, features retail, office, and residential units which wrap a concealed parking deck. The taller residential building references a traditional Charleston vernacular with a highly expressive articulated base, an elegant simple center shaft, and classical articulated upper levels that celebrate the cornice and frieze details at the roof. The elegant materials palette of cast stone, brick, ornate steel, and aluminum carry over to the mixed-use building, with upscale finishes accent the interior.

Kimley-Horn was selected to provide professional planning and civil engineering services for the development of the new 187,000-square-foot Global Home of the PGA TOUR. In addition to the three-story Global Home building, the site will include future office expansion areas, a spectator village, as well as an admissions gate and shuttle drop-off zone. Kimley-Horn is providing entitlement planning, engineering, and permitting services. The scope of services also includes roadway design, traffic engineering, signal design, civil/site plans, and construction phase services. Kimley-Horn is coordinating permitting for the Global Home project through St. Johns County, St. Johns River Water Management District (SJRWMD), and the U.S. Army Corps of Engineers (USACE).

Kimley-Horn is currently providing professional civil engineering services for the new JEA HQ in downtown Jacksonville. The proposed 207,000-square-foot office building is set to include an 850-space parking garage. Our specific services for this project include due diligence, civil site design, entitlement services, environmental services, and landscape architectural service.

## MD ANDERSON CANCER CENTER

JACKSONVILLE, FL

This redevelopment project won the 2016 Northeast Florida Planning and Zoning Association (FPZA) Redevelopment Project Award and was subsequently selected as the winner of the 2017 FPZA Statewide Outstanding Redevelopment Award of Merit. Baptist Hospital partnered with MD Anderson to redevelop two blocks within Historic San Marco to construct a world-class cancer treatment facility. Kimley-Horn was selected by Baptist Hospital to provide entitlement, traffic engineering, site civil engineering and permitting services for the 505,000-square-foot medical center, located in downtown Jacksonville. Kimley-Horn is responsible for aiding Baptist Medical Center and the Baptist team on zoning and land use entitlements, mobility fee negotiations, a major downtown traffic study, and the preparation of site development drawings for the state-of-the-art cancer treatment facility located in the beautiful and historic San Marco (Jacksonville).

**COMPLETED** | 2018 **SIZE** 505,00 SF **SERVICES I** Entitlement Traffic Engineering Site Civil Engineering Permitting Services AWARDS | 2018 Northeast Florida Planning and Zoning Association (FPZA) "Before Its Time" Award 2017 Statewide Florida Planning and Zoning Association (FPZA) "Outstanding Redevelopment Award of Merit" 2016 Northeast Florida Planning and Zoning Association (FPZA)

"Outstanding Redevelopment

Kimley-Horn partnered with the The District's Community Development District (CDD) to provide professional engineering services for The District project, a 32-acre mixed-use development that's planned to transform Downtown Jacksonville's Southbank. The project is proposed to include 1,170 residential units, 200,000 square feet of office space, 200,000 square feet of retail space, a 125-slip marina, a 3.5-acre riverfront park, 1,950-foot addition to the Riverwalk, riverfront bars and restaurants, and a hotel. Our services on this project include the civil roadway and utility infrastructure design and the landscape/hardscape concept and design of the public roadways, parks, and Riverwalk expansion intended to serve the future private developments. We also provided sea wall & bulkhead design, brownfield environmental services, and permitting services.

Cascades is an urban redevelopment that will offer a vibrant live-work-play experience in downtown Tallahassee. As one of the largest economic redevelopments, Cascades will further enhance the community's goal of attracting young professionals through the midrise residential offerings, retail and commercial offices, multiple restaurants, hotel and public plaza. In addition, the site will offer family-friendly entertainment and connections to the downtown through pedestrian-friendly paths. Wood+Partners Inc. (Landscape Architect) is providing design through construction phase services for this project.

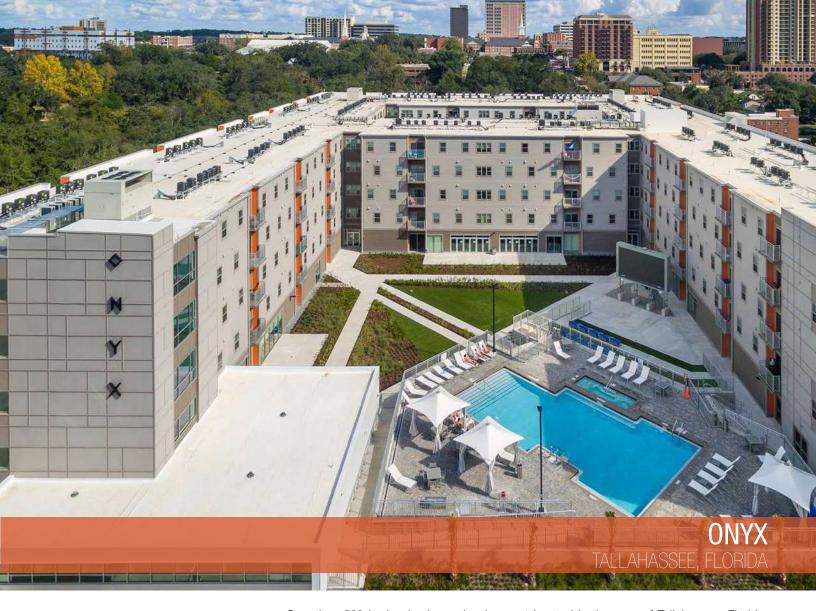

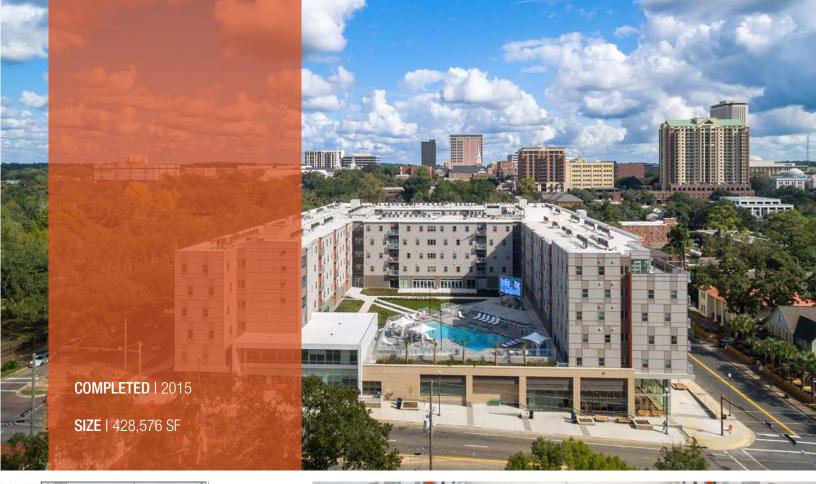

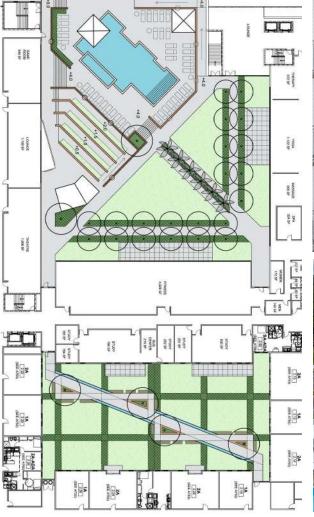

Onyx is a 583 bed, mixed use development located in the core of Tallahassee, Florida, adjacent to Florida State University. Wood+Partners, Inc. (Landscape Architect) provided conceptual design through construction phase services for the \$50M development. The development includes streetscape enhancements and two courtyards on the third floor of the building. The eastern courtyard provides a contemplative space in the form of a Zen Garden. The western courtyard, approximately half an acre in size, includes a swimming pool, amphitheater with Jumbotron, greenroof, and outdoor kitchen area.

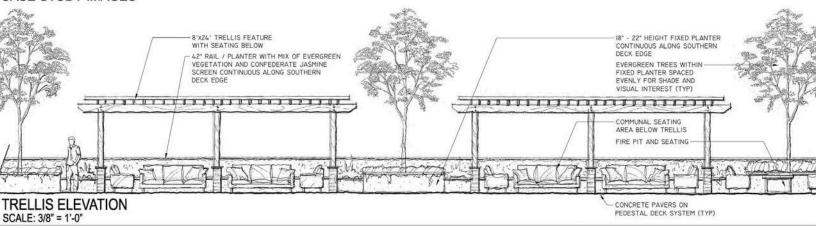

CASE STUDY IMAGES

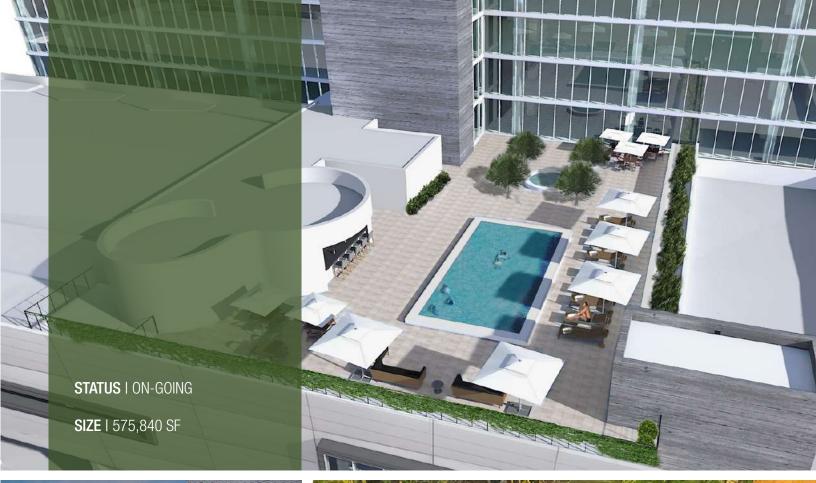

## WASHINGTON SQUARE

TALLAHASSEE, FLORIDA

Washington Square is a mixed-Use 19 story development featuring condos, Loews Hotel, and rooftop dining restaurant. The \$90 Million mixed-use project will occupy one entire city block when complete. The project will be three different vertical levels of amenities. The street level will feature a courtyard with a garage beneath, level 5 will be a rooftop garden event lawn with a prominent water feature and level 7 will be a rooftop pool alongside a bar and restaurant. Wood+Partners Inc. (Landscape Architect) is providing conceptual planning services including permitting services. Wood+Partners Inc. is designing the features that include the rooftop garden with water feature, event lawn, and outdoor seating area with trellis.

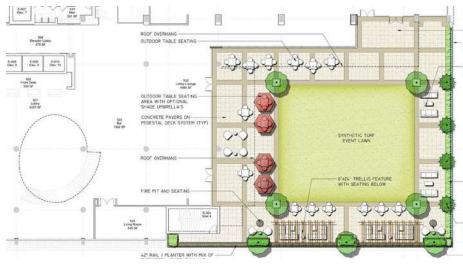

Wood+Partners Inc. (Landscape Architect) is providing planning through construction phase services for the 110 Ann Street Hotel development. The proposed urban hotel is a 192,500 square foot +/- featuring 211 rooms within a six story structure along Ann Street in Savannah, Ga. The hotel will feature a 4,7000 square foot meeting space, 20,500 square foot food and beverage space, 1,500 square foot of retail space and raised pool/amenity deck. The proposed amenities include second floor courtyard area with seating areas, grand fountain feature, vertical planters, and a fireplace.

Wood+Partners Inc. (Landscape Architect) is providing planning through construction phase services for the 111 Ann Street multi-family urban development. The proposed development will provide 225 apartment units in a six-story, 270,000 square feet structure that includes 68,000 square feet of structured parking spaces, lobby and amenities, retail shell space and rooftop pool amenities. The proposed amenities include private cabanas, raised water features, fire pit, outdoor grilling area, and a trellis shade structure.

Dasher Hurst, working with our client Southeast Group and Danis Construction, is developing the design to adaptively reuse the historic Barnett Building as an exciting new catalyst for the redevelopment of downtown Jacksonville. The building is planned as a mixed-use facility including business incubator and accelerator programs, higher education, and residential spaces, and promises to be the "hub" of downtown's emerging center for startup business.

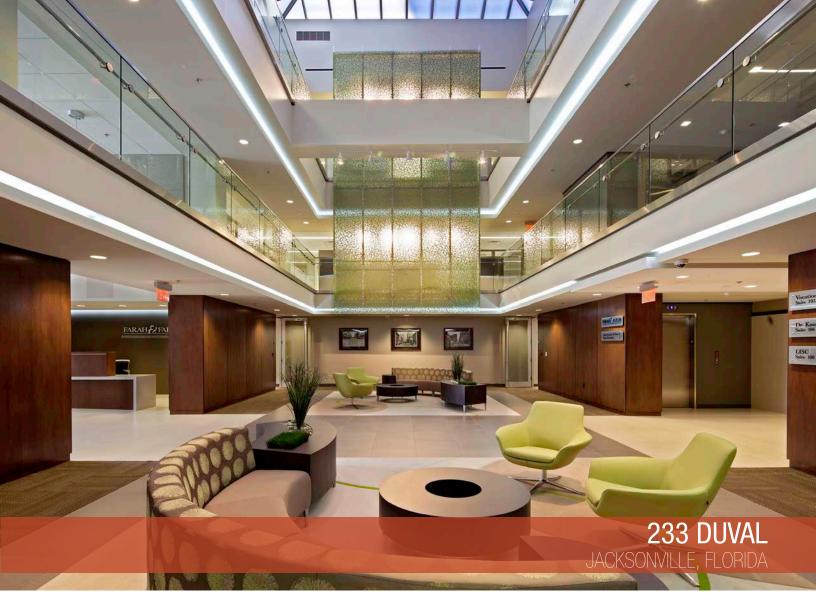

The 18-story building, constructed in 1926 as Jacksonville's tallest building, will be fully restored including its exterior masonry, stone, windows and dramatic new lighting. The building is being listed on the National Register of Historic Places, thereby making it eligible for historic tax credits which will help fund the renovation. Additionally, the project team is anticipating LEED Certification for the project.

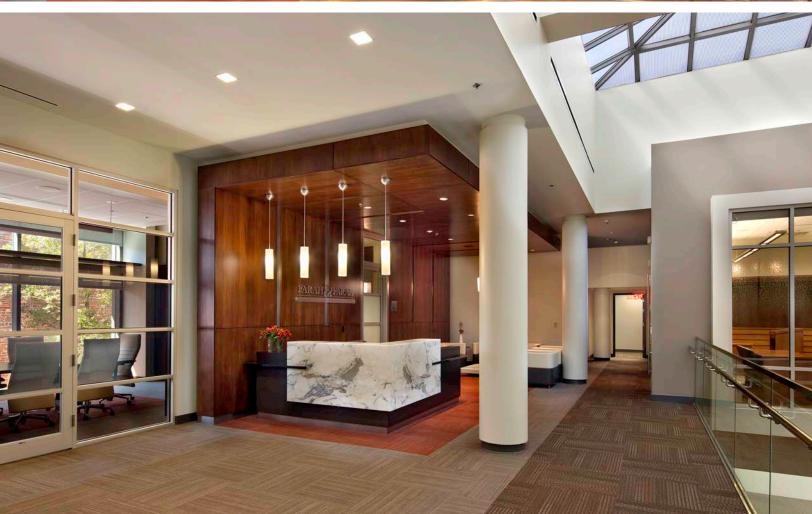

In 1955, the Independent Life Insurance Company constructed a new headquarters building at the corner of Duval and Julia Streets in downtown Jacksonville that would become recognized as a landmark mid-century design. However, the passage of time and changes in ownership have left the building abandoned and neglected. Our firm was tasked with helping to envision how to sensitively and respectfully restore the existing building while adding new program square footage and parking to allow the building to better serve the needs of 21st century office tenants.

The new building addition is comprised of three primary functions. Office space on the upper floors with parking below and storefront retail facing the Duval Street. The office levels were increased by 7,470 s.f per floor for a total of 13,790 s.f. per floor, making them comparable to other major office buildings in town. The parking garage contains 223 parking spaces on four levels and is accessed from the rear façade on Church Street.

Spandrel Development Partners is well capitalized internally and has an extensive network of institutional capital partners ranging from life insurance companies and wealth management firms to international and regional banks. Typically, our development projects employ a healthy and conservative mix of both debt and common equity. We underwrite obtaining a 65% loan-to-cost construction note, with the balance of development costs being funded through common equity. We do not overleverage our projects through the use of preferred equity or mezzanine debt. Generally, the common equity is split 90%/10% between the limited partner (i.e. a large institutional fund management company) and the general partner or Spandrel Development Partners. This type of deal structure is extremely common in the industry, what we have used on past deals, and what we would plan to employ for the Ford on the Bay development. Recent institutional debt and equity partners include Alliance Bernstein (NYSE: AB), Armada Hoffler (NYSE: AHH), Citizens Bank, M&T Bank, Northwestern Mutual Life, and Prospect Ridge, among others. A detailed firm financial statement can be provided to the DIA upon the execution of a confidentiality agreement.

Spandrel Development Partners and its affiliates are not involved in any litigation.

Armada Hoffler (NYSE: AHH)

#### **RAL Companies**

Developer 1 Brooklyn Bridge Park Managing Director

We are happy to provide the contact information for our references to the DIA upon request.

The team plans to make every reasonable effort to ensure that minority and locally owned businesses have the maximum opportunity to participate in the redevelopment process. Local architecture firm, Dasher Hurst, and local law firm, DMHD, are already key members of our Team.

#### CONCEPTUAL SITE PLAN SUMMARY

The redevelopment of Area 1 - The Exchange and Area 2 - The Enclave on the Bay sets out to create a vibrant live, work, play destination in the heart of downtown Jacksonville. Through the mixed-use development, residents and visitors will activate an underutilized part of the downtown. Assimilation of site elements and building architecture will result in The Exchange and The Enclave blending harmoniously with the skyline of the city. Respecting development standards set forth by the Jacksonville Economic Development Commission and the City of Jacksonville will ensure site features provide seamless integration with the surrounding context.

#### **ARCHITECTURE**

The Architecture of the development follows traditional building scaling reductions within a larger footprint to provide contextually appropriate infill necessary for a development of this size to be accessible and visually inviting. The skyline will feature steps in buildings, occupied decks and a central building that has signature elements that will provide a distinguished sense of place in a timeless manner. In successful cities, buildings with traditional and contemporary overtones add to the diversity of appearance and lend to the effect of a city built over time instead of a large exclusive complex that ignores context.

From the historical photos, one sees the potential of a large waterfront space, lower massing by the water and taller buildings on Bay St. This site is best as a midrise to allow more space and variety on the skyline. The waterfront will be defined by these traditionally inspired masses which form a foundation for the entire complex. Four Story brick masses fitting below the height setbacks, yield to private terraces above.

Bay St. is completely retail and building lobbies with plenty of room for signage and sidewalk activity. In addition to copious amenities and retail along the waterfront, Ground floor residential uses are contemplated at the southern end of both buildings along Courthouse Drive (Enclave) and Courthouse walk (Exchange). This will ensure an "eyes on the street ownership" and increase the livability factor desired by all neighborhoods. Most of these units will be lofts.

We have located the Enclave entry interior to the site along the alley (mews) to free up the perimeter for other commercial activity and lend a bit more safety and simplicity to the two buildings' organization.

The wrapped decks in the center of each mass allow for the most economical means of providing parking while minimizing the exterior exposure. Where the garage is exposed on the Exchange above the second floor, it will be clad with materials consistent with the balance of the project. Also, on the Exchange building, the deck will have two entrances to allow for service to the grocery and a floor to floor height consistent with allowing services such as trash removal, move-in move out and deliveries to be internalized. On the Enclave building, these services are provided on Liberty St.

The grocery is located in the center of the Exchange block to allow for residential and smaller retail entries at the corners. Typical grocers also eschew too many windows. In the event that a grocer wants the corner as well, it is easy to maneuver.

#### PUBLIC AND SEMI-PUBLIC REALM

Activation of these prominent riverfront parcels of land is based on the creation of public and semi-public space. These environs will play host to a range of features including outdoor dining / cafés courtyards, shade lined pedestrian paths, and civic art installations. Each of these elements are characteristics of successful developments that attract people in support of the 24 hour, seven days a week destination desired by this solicitation. A series of distinct spaces within the public realm have been designed in support of activating street life.

The Exchange on the Bay includes the 'Café Allee', an outdoor dining space framed by an allee of shade trees and the 'Riverwalk Alley', an extension of the St. Johns Riverwalk (Riverwalk) which provides connectivity from South Market Street to South Newman Street in a remnant alley way. In the northwest corner of The Exchange, an urban open space that transitions from the public realm into the building will include the installation of a piece of civic art. The existing Jacksonville Transportation Authority bus shelter at the northeast corner of East Bay Street and South Market Street will be integrated into the architectural design of the proposed building.

The Enclave on the Bay features an urban open space at the corner of East Bay Street and South Market Street. From this corner, looking south, the St. Johns River is framed by the shade trees lining South Market Street. On East Bay Street, at the existing mid-block crossing, an outdoor café will accent the ground floor retail establishments. As residents and visitors move from the public realm to the private realm of the building's entry courtyards are provided

Along the northern side of Courthouse Drive, a shade tree lined pedestrian promenade will host pop-up market events and food truck gatherings. This promenade and the envisioned activities serve as an extension of the Riverwalk directly to the south. Drawing from the SWA – JAX Riverfront Design Guidelines, the project will construct the segment of the Riverwalk south of Courthouse Drive between South Market Street and South Liberty Street.

Providing nearly 30' of pedestrian walkway, the Riverwalk improvements will connect to the portion of the project already under construction. As identified in the guidelines, specialty pavement, site furnishings, lighting, landscape, and way-finding signage will be consistent with the overall intent of the Riverwalk. A key feature of this proposal is the commissioning of local artist to develop a site specific art installation as part of the activity node to commemorate the Great Fire of 1901.

Table 1 provides a summary of the public realm and Tables 2 provides a summary of the green and open space envisioned for Areas 1 and 2. The use of a consistent pattern of spaces and vocabulary of materials reinforces the sense of place desired for this development. On each street frontage the creation of an amenity zone, pedestrian clear area, and frontage area will comply with the development standards. The City of Jacksonville Downtown Streetscape Design Guidelines are recognized and the requirements for the Gateway and Business-Inter-District treatments in the public realm have been incorporated into the proposed design. Specialty pavers, picture frame broom finished concrete, tree wells, shade trees, benches, bike racks, waste receptacles, and streetlights will unify The Exchange and The Enclave while simultaneously blending with the context of downtown Jacksonville.

Throughout the public realm native trees situated in tree wells will provide shade to users. The selected species of trees will be consistent with the requirements of the City of Jacksonville – Tree Commission Approved Tree Planting List. Tree wells and soil volume will be constructed to promote the viable growth of the trees over time. The preservation of the six existing oak trees at The Exchange maintains the current level of shade enjoyed by users of East Bay Street.

TABLE 1 - PUBLIC AND SEMI-PUBLIC REALM CHARACTERISTICS

Area 1 – The Exchange on the Bay					
Public Realm	Amenity Zone	Pedestrian Clear Area	Frontage Area		
South Newman Street (East)	4'	8'	2'		
East Bay Street (South)	4'	20'	2'		
South Market Street (West)	4'	12'	2'		
Riverwalk Alley	4'	22'	2'		
Area 2 – The Enclave on the Bay					
Public Realm	Amenity Zone	Pedestrian Clear Area	Frontage Area		
South Market Street (East)	4'	10'	2'		
East Bay Street (South)	4'	9'	2'		
Proposed Street (West)	7.5'	5'	7'		
Proposed Street (East)	7.5'	5'	7'		
South Liberty Street (West)	4'	8'	2'		
Courthouse Drive (North)	7'	10'	5'		
Courthouse Drive (South) / Riverwalk	4'	26'	-		

TABLE 2 - GREEN AND OPEN SPACE SUMMARY

Area 1 – The Exchange on the Bay			
	Open Space	Green Space	
Public Realm	33,200 GSF	3,900 GSF	
Street Trees Planted	31		
Existing Trees Preserved	6		
Outdoor Café / Dining / Urban Open Spaces	X 3 Areas		
Area 2 – The Enclave on the Bay			
	Open Space	Green Space	
Public and Semi-Public Realm	37,000 GSF	21,000 GSF	
Street Trees Planted	83 (including median trees)		
Outdoor Café / Dining / Urban Open Spaces	X 3 Areas		

The rich colors and material variety populate the historic waterfront and are contemplated by this proposal.

#### MULTIMODAL TRANSPORTATION

Central to the framework of this project is the creation of multimodal infrastructure that embodies the principles of Complete Streets. The extensive pedestrian enhancements summarized above are complimented by an array of improvements to the street network. Along each road frontage, enhanced on-street public parking spaces and intersections are envisioned. Table 3 provides a summary of proposed on-street parking spaces. Bulb out curbs that encapsulate the on-street parking spaces will provide shelter to cars and afford shortened pedestrian crosswalk distances to adjoining city blocks. Recognizing the changing nature of personal vehicle usage a series of dedicated rideshare / autonomous transit vehicle drop-off spaces are scattered across the two blocks. The on-street parking spaces are articulated with specialty paving that compliments the character of the adjacent public realm.

The reconfiguration of South Market Street contemplates the a shade tree lined median. While framing views of the St. Johns River to the south, the feature also creates a more human scaled boulevard that accommodates pedestrians rather than the automobile. Enhanced crosswalks and midblock crossings that facilitate the movement of people is a central improvement of this development. Strategically positioned along South Market Street and Courthouse Drive these elements provide safe passage to pedestrians allowing greater connectivity to adjacent residential, retail, and the Riverwalk. The Enclave on the Bay introduces a new street as part of the required view corridor to the river. This street provides vehicular access to a parking garage and pedestrian access to the Riverwalk via Courthouse Drive. The terminating vista of the tree lined corridor accentuates the Riverwalk with views of the St. Johns River. With access to walk-up residential units and a courtyard the street will be active with life.

### TABLE 3

Total:	26	1

Jacksonville had simple working sheds above the water in linear forms to work with vessels and the easy transport of goods into and out of the warehouses.

So many cities reach back for these days of pedestrian centered vibrancy. The fundamental economics of urban residents contemplated by this proposal and lining of ground floors with retail are precedents to this revival.

Please reference Table 4 for details on the anticipated square footage of this project.

TABLE 4

Project Totals	Enclave	Exchange	Totals
Gross Residential	332,859	295,723	628,582

Studio Apartments	60	70	130
One Bedroom Apartments	164	121	285
Two bedroom Apartments	48	56	104
Total Apartments	272	247	519

Without sacrificing luxury amenities and creative design, ambitious Green project features to include vegetative roofs, high efficiency HVAC systems, ample bike storage and workshop, electric car charging stations, opportunities for a community garden, and stormwater management that complies with the goals of the city. In-unit features will include significant daylighting, energy star appliances, low VOC paint and flooring materials, low flow toilets, and locally-sourced materials wherever possible - inlcuding reclaimed wood and artwork by local artisans.

# FINANCIAL AND NON-FINANCIAL RETURNS TO THE CITY

The Team believes that our mixed-use program described in our RFP response will provide a substantial and lasting benefit to the City of Jacksonville. As such, we are proposing that the City contribute the land to this development for the overall benefit of the City of Jacksonville. Not only will our proposed development vastly improve long underutilized riverfront land, but it will also add nearly two acres of newly landscaped public space to Downtown Jacksonville, highlighted by a beautiful extension to the River Walk. While we anticipate the River Walk extension to cost \$5mm, the comprehensive benefit to the City of Jacksonville of our placemaking effort will be multiples of that and long lasting. Further, Spandrel's approximately \$136mm investment in Downtown Jacksonville will have a multiplier effect on the local economy with a much broader impact on Downtown Jacksonville. This development will not only set a new precedent for development and catalyze future development in the downtown core, but also add about 520 units and 620 beds Downtown. This influx of new residents will increase the tax base Downtown and help invigorate the struggling retail. The economic impact of this is significant. More people living Downtown also means less people driving to work and a reduction in congestion and pollution. All in all, the Ford on the Bay developments will provide Downtown Jacksonville with a lasting economic benefit well in excess of what can be quantified today and the assessed values of the land.

Per Jerry Holland, Property Appraiser, the market land values for Area 1 is \$3,149,400 and for Area 2 is \$3,937,838. For both sites, the total appraised market land value is \$7,087,238. The following table reconciles the appraised land values to our proposed purchase price.

Appraised Land Value: \$7,087,238

Less: Estimated CBRE Fee (\$1,293,021)

Less: Estimated Cost to Extend River Walk (\$4,913,388)

Less: Estimated Cost to Extend River Walk
Less: Estimated Benefit of Increased Tax Base (10 Years) (\$4,913,388)

Less: Benefit of Placemaking on Property Values
Less: Benefit of Lanscaping on the Environment
Less: Benefit of Multiplier Effect of \$100m Investment
Less: Benefit of Development Catalyzing Future Growth

Estimated multi-million dollar impact Estimated multi-million dollar impact Estimated multi-million dollar impact Estimated multi-million dollar impact

We are confident this development's benefits will provide outsized returns beyond what is identified above to the City of Jacksonville on their \$7.1mm investment. Furthermore, the City's contribution will allow us to reallocate the land costs towards building quality, architectural features, hardscapes, and landscapes that will restore these sites to their deserved prominence in Downtown Jacksonville.

# OTHER REQUIRED FINANCIAL ITEMS

Spandrel Development Partners is well capitalized internally and has an extensive network of institutional capital partners ranging from life insurance companies and wealth management firms to international and regional banks. Typically, our development projects employ a healthy and conservative mix of both debt and common equity. We underwrite obtaining a 65% loan-to-cost construction note, with the balance of development costs being funded through common equity. We do not overleverage our projects through the use of preferred equity or mezzanine debt. Generally, the common equity is split 90%/10% between the limited partner (i.e. a large institutional fund management company) and the general partner or Spandrel Development Partners. This type of deal structure is extremely common in the industry, what we have used on past deals, and what we would plan to employ for the Ford on the Bay development.

For the Ford on the Bay development, we plan to capitalize out general partnership interest in the deal through our internal equity fund and call on our institutional limited partner relationships for the additional equity required. Our principles have approval power over our fund capital, while limited partners general have committee-based approval processes in place. We plan to fund 35% of total project costs in each phase with equity. We only partner with institutional-grade limited partners who have extensive urban development experience. Please see the qualifications section in our RFP Response for limited partners relationships. Past project budgets can be provided to the DIA upon the execution of a confidentiality agreement.

On the debt side, we plan to employ a modest 65% loan-to-cost construction loan on both phases of the Ford on the Bay development. We do not anticipate using preferred equity or mezzanine debt. We have existing relationships with many bank and non-bank lenders who would be interested in providing the construction financing for this deal. We anticipate a construction loan term of 3 years with two 1-year extension options. Once the property is stabilized, permanent financing would recapitalize the existing construction debt likely for a 30-year term.

In the Financial Feasibility section and Excel Underwriting, you will see a detailed sources and uses for the proposed developments that details total project costs, including the respondent's fee and cost of structured parking.

We have described what we believe to be some of the economic impacts on the City of Jacksonville from our proposed Ford on the Bay development in the Financial and Non-Financial Returns to the City section above. In addition to this, the development will create more than 100 construction jobs during each construction phase and employ over 50 people in the retail bays once operational.

# CITY OF JACKSONVILLE PROCUREMENT DIVISION

Ed Ball Building, 8th Floor 214 N. Hogan Street Jacksonville, Florida 32202

ADDENDUM NO:	ONE (1)
BID NUMBER:	ISP-0307-20
TITLE OF BID:	NOTICE OF DISPOSITION OF DUVAL COUNTY TAX PARCELS 074443-0000 AND 073358-0000
OPENING TIME AND DATE:	JANUARY 22, 2020 @ 2:00 P.M.

THIS ADDENDUM IS ISSUED FOR THE INFORMATION OF BIDDERS ON THE ABOVE TITLED PROJECT AND WILL BE PART OF THE CONTRACT.

## 1. CLARIFICATION:

The due date for proposals is **January 22, 2020**. Proposals are due by 2:00 p.m. at:

Ed Ball Building 214 N. Hogan Street, Room 105 Jacksonville, FL 32202

### 2. CLARIFICATION:

The Non-Mandatory Pre-Proposal Meeting shall be held at:

Ed Ball Building 214 N. Hogan Street, <u>Suite 800</u> Jacksonville, FL 32202

The date and time of the meeting remain Tuesday, November 5, 2019 at 2:00 p.m.

End of Addendum 2

# CITY OF JACKSONVILLE PROCUREMENT DIVISION Ed Ball Building, 8th Floor 214 N. Hogan Street Jacksonville, Florida 32202

ADDENDUM NO:

THREE (3)

BID NUMBER:

ISP-0307-20

NOTICE OF DISPOSITION OF DUVAL COUNTY TAX PARCELS 074443-0000 AND 073358-0000

OPENING TIME AND DATE:

JANUARY 22, 2020 @ 2:00 P.M.

THIS ADDENDUM IS ISSUED FOR THE INFORMATION OF BIDDERS ON THE ABOVE TITLED PROJECT AND WILL BE PART OF THE CONTRACT.

# 1. FOR YOUR CONVENIENCE:

Below is a link to the movie that was played at the Non-Mandatory Pre-Proposal Meeting. <a href="https://player.vimeo.com/video/362153193">https://player.vimeo.com/video/362153193</a>

# 2. FOR YOUR CONVENIENCE:

Included in this addendum is the sign-in sheet from the Non-Mandatory Pre-Proposal Meeting.

### 3. FOR YOUR CONVENIENCE:

Included in this addendum is the Plan Holders List as of November 27, 2019.

Note: These are the firms that have downloaded the Notice of Disposition (NOD) documents from the City of Jacksonville's website. This list may not include firms that have visited CBRE's website.

# 4. **QUESTION**:

What Planning & Zoning Permits will be required to develop Parcel 074443-0000 (220 East Bay Street) into a multi-family apartment building with a parking structure and retail along East Bay Street?

# **ANSWER:**

A development is required to obtain conceptual and final design approval from the Downtown Development Review Board (DDRB). Specifics regarding DDRB approval are contained in section 656.361.7.1 of the Jacksonville Code of Ordinances, which is published on <a href="https://www.municode.com">www.municode.com</a>.

Engineering review and other permits issued through the Planning and Development Department, Development Services Division and Building Inspection Division may be found at: <a href="https://www.coj.net/departments/planning-and-development.aspx">https://www.coj.net/departments/planning-and-development.aspx</a>.

### 5. QUESTION:

What costs are associated with that permitting?

## **ANSWER:**

The application fee is \$750.00 and covers both conceptual and final approval. A complete list of fees charged for Planning and Zoning permits may be found at: <a href="https://www.coj.net/departments/finance/city-fees">https://www.coj.net/departments/finance/city-fees</a>.

# 6. QUESTION:

Do the City of Jacksonville or Duval County have any impact fees (i.e. Parks & Recreation, Transportation, Mobility, Schools, etc.)?

# **ANSWER**

There are no impact fees within the City of Jacksonville but there are Mobility Fees which are explained via the link below; however, the property is within a Development of Regional Impact (DRI); the transportation impacts of which have been mitigated for existing development and unallocated Phase I development.

https://www.coj.net/departments/planning-and-development/development-services-division/concurrency-and-mobility-management-system-office).

Area 1 and Area 2 of the site contained 210,396 square feet of government office entitlements and 363,156 square feet of government office entitlements, respectively. The DRI allows for a conversion of government office to multi-family as follows: 1,000 square feet of government office equates to 2.403 multi-family units.

The existing entitlements should not be viewed as a limitation on redevelopment. Any deficit in entitlements will be allocated by the Downtown Investment Authority (DIA) and, to the extent additional development rights may be accommodated for in Phase I of the DRI, those additional entitlements would also have mitigated transportation impacts. Should the Downtown Investment Authority allocate Phase II or Phase III entitlements to the project, transportation impacts for only Phase II or Phase III would be subject to the City's Mobility Plan.

### 7. **QUESTION**:

Is the entire environmental cleanup for the site complete?

# **ANSWER:**

There have not been specific environmental cleanup actions conducted at the site; however, underground storage tanks containing heating oil were removed from both the Old Courthouse property (330 East Bay Street) and the former City Hall property (220 East Bay Street). Tank closure environmental assessments were done during the removal of each tank and these reports can be viewed via the link below. The tank closure assessment conducted for the Old Courthouse property did not identify any contaminants in the area of the removed storage tank. The tank closure assessment for the former City Hall property indicated the presence of polycyclic aromatic hydrocarbons (PAHs) present in the soil and initially in the groundwater at levels slightly above regulatory criteria. A follow-up investigation of the tank area did not verify the presence of contaminants in the groundwater. The follow-up investigation did confirm PAHs in soil above residential soil cleanup target levels but below commercial/industrial cleanup target levels. A copy of the follow-up environmental investigation report into the storage tank at the former City Hall can be viewed via the link below. Additional environmental investigation is planned by the City for the former City Hall storage tank area. The report is expected to be available in January, 2020 and will be released via addendum if it is available prior to the NOD submittal deadline.

https://filedrop.coj.net/?ShareToken=60F86615E68E64C60A68C7A4489B66836FE1D4D4

Note: the above link will expire on December 11, 2019 so please download/save the documents.

#### 8. OUESTION:

Have all the riverfront repairs been completed?

# **ANSWER:**

No.

### 9. OUESTION:

Have new bulkheads been installed after the riverfront renovations?

#### ANSWER:

New bulkheads have been installed in front of the Hyatt Hotel and at the Liberty Street Bridge.

### 10. QUESTION:

Will any additional offsite improvements be required?

#### **ANSWER:**

This is dependent on the development plans. Development plans will be reviewed by the City for offsite impacts to the transportation network, utilities, etc. Please see the answer to Question 6 in regards to the City's Mobility Plan and the DRI entitlements.

# 11. QUESTION:

What impact/mobility or other fees will be required?

#### ANSWER:

Please see the answer to Question 6 in regards to the City's Mobility Plan and the DRI entitlements. Additionally, there will be fees relating to the review of engineering plans, building permits, site clearing permits, etc. For a list of City fees, visit <a href="https://www.coj.net/departments/finance/city-fees">https://www.coj.net/departments/finance/city-fees</a>.

# 12. **QUESTION**:

Are all entitlements in place to develop what is being proposed in the Highest and Best Use Massing Study?

# **ANSWER:**

The Highest and Best Use Massing study options conform to the existing Downtown zoning overlay with regard to permissible heights, view corridors, and setbacks. CCBD zoning allows a wide range of uses which can be found in 656.361.5 Jacksonville Code of Ordinances. The property is within a Development of Regional Impact ("DRI"). Area 1 and Area 2 of the site contained 210,396 square feet of government office entitlements and 363,156 square feet of government office entitlements, respectively. The DRI Conversion Table is included in this addendum (labeled *Supplement 1a, Table S-2, Revised Land Use Transportation/Trade-Off Matrix*).

The existing entitlements should not be viewed as a limitation on redevelopment. Any deficit in entitlements will be allocated by the Downtown Investment Authority and, to the extent additional development rights may be accommodated for in Phase I of the DRI. The Downtown Investment Authority may allocate Phase II or Phase III entitlements to the project (see response to Question 6).

### 13. QUESTION:

When will the trolley/tram system going to TIAA Stadium be in place?

# **ANSWER:**

The Jacksonville Transportation Authority (JTA), an independent state agency serving Duval County, has multi-modal responsibilities including public transportation. At present, JTA does not operate (nor has any plans to operate) a trolley/tram system going to TIAA Bank Field. JTA does operate Gameday Xpress, a service that provides direct bus service from two downtown and three suburban parking lots directly to TIAA Bank Field and back on both Jaguar and college game days.

JTA is also developing an Ultimate Urban Circulator (U2C) concept. The preferred vehicle for the future U2C is the Autonomous Vehicle (AV). The concept will take full advantage of the existing Skyway assets and fully integrates advancing technologies. JTA has identified Bay Street as an innovation corridor that could include AV's, solar roads and sidewalks and a wide array of sensors and "smart infrastructure".

For more information on Gameday Xpress or U2C, visit the JTA web site at www.jtafla.com.

# 14. QUESTION:

Will the marina basin be transferred fee simple?

# **ANSWER:**

Area 3 is owned by the City in fee simple and could be transferred in fee simple if a proposal requesting such is selected. Ownership could also be retained be the City.

## 15. QUESTION:

Will the ROFO on Area 1 have any effect on the developer's ability to have a hotel component in area 2/3?

# **ANSWER**:

At this time, there is no restriction limiting hotel use on area 1, 2 or 3. If in future negotiations regarding the release of the ROFR, an agreement is reached that would restrict hotel use on any area, a subsequent addendum will be issued.

# 16. **QUESTION**:

No minimum or maximum parking is stated, but is there a target number of spaces the City has in mind?

# **ANSWER:**

There are no minimum parking standards targeted. There are no maximum parking limitations for structured parking. Surface parking is prohibited. As contained in 656.361.6.2, Jacksonville Code of Ordinances, new parking structures are encouraged to make ten percent (10%) of the spaces open to the public at all time.

# 17. QUESTION:

Will incentive packages vary based on the size of construction?

- What will they be for high-rise?
- What will they be for mid-rise?

### **ANSWER:**

Yes. There are no predetermined incentive packages for any particular use on the site. The complete list of incentives available and criteria for them can be found in the adopted Business Investment and Development Plan for DIA beginning on page 29. Below is a link to that plan:

https://dia.coj.net/downtown/Docs/20190807\_BID-Plan.aspx.

A respondent should identify if they are requesting one or more incentives and provide the ROI, as well as demonstrate the need for the incentive.

# 18. QUESTION:

Who is financially responsible for expanding the Riverwalk?

#### **ANSWER:**

The Developer who is awarded the bid on Area 2 or Areas 2 and 3 will be financially responsible for expanding the Riverwalk. Incentives may be requested to cover a portion of this cost where warranted by enhanced design elements beyond standard pavement, furnishings and landscaping.

# 19. QUESTION:

If you fill in part of the marina and expand the lot size of area 2, do the 50-foot setbacks move back?

#### ANSWER

Yes.

#### **20. OUESTION:**

Are there any planned zoning incentives or exceptions?

#### **ANSWER:**

No. Please note that the zoning overlay for Downtown was recently updated and can be found in Sections 656.361.1 through 656.361.9, Jacksonville Ordinance Code (link below). There are no floor area ratio bonuses, transferable development rights, and similar incentives within Downtown. That said; there are also no predetermined zoning limitations on density or square footage within the Commercial Central Business District underlying zoning district.

https://library.municode.com/fl/jacksonville/codes/code\_of\_ordinances?nodeId=ZOSE\_CH656ZOCOPT3SCDIRE\_SPHDOOVZODODIUSFORE

### 21. QUESTION:

Can you please explain the 62.5% ground floor retail requirement, and elaborate on what is expected of the remaining 37.5%?

# **ANSWER:**

The RFP states that "Proposals shall include ground floor retail uses (e.g., restaurants, retail, etc.) directly fronting and accessible by Bay Street at a minimum ratio of eighty percent (80%) of its ground floor Bay Street building frontage. At a minimum, the proposal shall include at least one semi-public use such as a sidewalk café or patio seating along Bay Street. 62.5% of the required retail must be street level while the balance can be second floor space."

While 80% of the building frontage is the desired retail frontage, the concept expressed is that 62.5% of the frontage must be ground floor retail and the balance of 80% frontage requirement or 17.5% of the linear frontage distance could be satisfied with second floor retail that activates the street such as a restaurant with an outdoor balcony. The remaining 37.5% of the ground floor building frontage could include residential units, offices, etc. fronting Bay Street.

#### 22. QUESTION:

Will there be any tax incentive packages?

### **ANSWER:**

REV grants, or Recaptured Enhanced Value grants, are tax rebates of ad valorem taxes and are a commonly used incentive of the DIA. The criteria for REV grants can be found beginning on page 230, "Incentives and Funding Programs", via the link below:

https://dia.coj.net/downtown/Docs/20190807 BID-Plan.aspx

A respondent should identify if they are requesting one or more incentives and provide the ROI, as well as demonstrate the need for the incentive. Whether any incentive is provided will depend on the bid response(s) selected.

# 23. **QUESTION**:

Is there any concrete plan to move the jail, and if so, what is the timeline?

#### **ANSWER:**

Mayor Curry and the Administration have publicly discussed moving a Jail Relocation Program up in the Capital Improvement Plan (CIP); however, that process has not yet commenced.

#### 24. OUESTION:

Does the City have any documentation related to Phase I environmental assessments and/or geotechnical engineering reports for the sites?

#### **ANSWER:**

An Environmental Site Investigation was done for both the Old Courthouse property (330 East Bay Street) and the Former City Hall property (220 East Bay Street) as part of the demolition efforts of

the former structures at the site. The purpose of these investigations was to determine the presence of any hazardous substances or materials on the property that would require abatement/removal prior to demolition and redevelopment of the property. These reports can be viewed via the link in Question 7. Other environmental reports related to the former storage tanks on these properties are available as described in the response to Question 7.

# 25. QUESTION:

Does the City have a preference on how stormwater impacts should be addressed for the sites? Is it provided through an existing off-site facility (proportionate fair share agreement?) or does it need to be provided on site?

### **ANSWER:**

In lieu of on-site stormwater facilities (i.e., pond or vault) for stormwater treatment, respondents should contemplate the purchase of Downtown's Surplus Water Quality Compensatory Credits with the St. Johns Water Management District permit number 18269-1. One credit is equal to one acre of development at 80% impervious with a cost of approximately \$35,000.00 per credit.

## **26. QUESTION:**

Will transportation impacts have to be addressed through mitigation/fees?

### **ANSWER:**

Please see the answer to Question 6 in regards to the City's Mobility Plan and the DRI entitlements.

# 27. **QUESTION**:

Has there been an assessment of the bulkhead/sea wall for the marina site?

#### ANSWER:

Yes. The assessment reports will be made available through an addendum if they are available prior to the NOD submittal deadline.

# 28. QUESTION:

Have any studies been commissioned that have analyzed Area 3 and its feasibility for marina redevelopment? Has the underlying land been cleared?

# **ANSWER:**

No studies have been commissioned to analyze Area 3 and its feasibility for marina development.

The former parking deck has been demolished and about 90% of the support piles were completely removed. The piles that could not be removed (about 140) were cut off two feet (2') below the surface of the riverbed. Detailed records were kept during the pile removing process and an as-built diagram showing the approximate location of the remaining piles will be prepared. The as-built diagram will be made available through an addendum if it is available prior to the NOD submittal deadline.

### 29. QUESTION:

How would property taxes be treated for Area 3?

#### ANSWER:

Submerged lands in Duval County are currently assessed by the Duval County Property Appraiser at \$170/acre and taxable for any private owner. The total assessment of the Area 3 parcel will ultimately depend on how the buyer uses the site. For example, if the area is used as a marina, a surface parking deck and/or pier that supports a use on the upland area, or if the site is filled, it will be assessed accordingly and taxable for any private owner.

### **30. QUESTION:**

Could you please confirm that the comparable project thresholds are to be representative of principals of the development team?

# **ANSWER:**

Yes.

# 31. QUESTION:

Does the DIA have any in-house data that they have collected on Downtown trends that could be made readily available for use in our RFP response besides any information in the NOD?

#### ANSWER:

Downtown performance in key indicators, such as employment and residential, each year are tracked and analyzed, the results of which are published by Downtown Vision, Inc. in their annual State of Downtown report, which may be found at <a href="http://downtownjacksonville.org/Media/Publications.aspx">http://downtownjacksonville.org/Media/Publications.aspx</a>.

# 32. QUESTION:

Does the DIA have any other tools outside of Retail Enhancement Grants to cultivate a vibrant retail mix Downtown that a proposed development on this site would be eligible for?

### **ANSWER:**

Retail Enhancement Grants are not available for new construction. Other incentives, such as loans, tax rebates, etc., can be found beginning on page 230, "Incentives and Funding Programs", via the link below:

https://dia.coj.net/downtown/Docs/20190807\_BID-Plan.aspx

# 33. QUESTIONS:

Who is responsible for the cost associated with the extension of the Riverwalk along Courthouse Drive? If the selected developer is responsible, is the DIA willing to provide any subsidies for this extension, and if so, in what form?

#### **ANSWER:**

The developer who is awarded the bid for Area 2 or Areas 2 and 3 is responsible for the extension of the Riverwalk along the City constructed bulkhead, or any new bulkhead constructed by the Developer within Area 3 riverward of the current bulkhead line. Incentives may be requested to cover a portion of this cost where warranted by enhanced design elements beyond standard pavement, furnishings and landscaping.

### 34. QUESTION:

Is Area 3 (marina site) fully entitled for marina slips, and if entitled, how many slips are permitted?

#### **ANSWER:**

The site is not at this time specifically entitled for a marina, noting however, that marinas are a permitted use. Further, there are available marina entitlements within Downtown that have been contemplated for use on this site.
